DATA SHEET: XYLITOL

Rev.: 1 Made at/from: 1.04.2021/AM Approved at/from: 1.04.2021/SIS

General Information & Description:

Xylitol (also known as birch sugar) is a good-tasting, white, crystalline sugar substitute with comparable applications to sugar.

Xylitol has gained importance in recent years, mainly due to its tooth-care properties. Compared to sugar, xylitol has about 40% fewer calories. In addition, by consuming xylitol instead of sugar, the blood sugar level rises less. Xylitol is a natural alternative to artificial sweeteners. Our sugar substitute is made from the raw material corn with a comparable sweetening power to sugar.

Facts:

- Helps maintain tooth mineralization
- 40% less calories, same sweetening power compared to sugar
- vegan & allergen free
